

FAQs

Whatever the question, cheese is the answer! Here you'll find Frequently Asked Questions about **The Laughing Cow®** cheese.

- **How long is the cheese safe to eat after I open the package?**

After opening the outer box, the cheese will be safe to eat until the expiration date on the bottom of the box, as long as it is kept refrigerated properly. After opening the foil wrapping, we recommend eating the cheese right away. Exposure to air will dry out the cheese.

- **How long past the "best before date" is the cheese still safe to eat?**

We recommend enjoying our products by the date on the package.

- **Does the cheese need to be refrigerated?**

The Laughing Cow® cheese should be refrigerated after purchase and opening to ensure the best quality and taste.

- **Is it okay to freeze the cheese?**

Please do not freeze **The Laughing Cow®** cheese as it will affect the quality.

- Does the cheese contain any animal rennet?

No rennet of animal origin is used in our products.

- Are The Laughing Cow® products suitable for vegetarians?

Yes, The Laughing Cow® products are all great for vegetarian diets!

- What allergens enter your production facility?

The production plants in which The Laughing Cow® products are produced contain no cereals containing gluten, crustacea, fish, egg, peanuts, sesame, soybeans and tree nuts. All of these cheese products are safe for people who are allergic to any of these ingredients.
